

# WHY REPAIR?

**75%** of Stone damaged **windshields** are **repairable** quickly and safely, **without removal**, at a fraction of the cost of replacement with our **NACCO**<sup>®</sup> System.

**M**ost windshield damage occurs when stones or other objects are kicked back toward the windshield of a car from a vehicle in front of it, causing an unsightly "**Bullseye**" or "**Star**". Since windshield glass is actually two sheets of glass bonded around a thin plastic layer, these "comprehensive" breaks can be filled almost invisibly with **NACCO**<sup>®</sup> brand resin, using our high-tech **NACCO**<sup>®</sup> injection equipment. Not only does the repair "**Look Great**", the repaired area is actually "**STRENGTHENED**" preventing further cracking, which causes replacement.

**T**he **NACCO**<sup>®</sup> System is proven and thoroughly reliable. It is approved and used by State departments, County departments, City departments, major auto rental's, truck leasing companies and Insurance companies. **NACCO**<sup>®</sup> resin is the most advanced resin available. So with all of this it should also carry the **best guarantee**. For the period you own your vehicle, we will refund your money if the repaired area does not retain it's optical clarity, fails to pass inspection, or cracks further.

For a demonstration of the remarkable **NACCO**<sup>®</sup> windshield repair contact the authorized **NACCO**<sup>®</sup> dealer listed here. They're the friendly experts in your area for all your windshield repair needs.
