

WHY REPAIR?

75% of Stone damaged **windshields** are **repairable** quickly and safely, **without removal**, at a fraction of the cost of replacement with our **NACCO**[®] System.

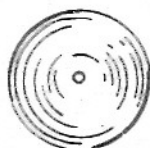

Most windshield damage occurs when stones or other objects are kicked back toward the windshield of a car from a vehicle in front of it, causing an unsightly "**Bullseye**" or "**Star**". Since windshield glass is actually two sheets of glass bonded around a thin plastic layer, these "comprehensive" breaks can be filled almost invisibly with **NACCO**[®] brand resin, using our high-tech **NACCO**[®] injection equipment. Not only does the repair "**Look Great**", the repaired area is actually "**STRENGTHENED**" preventing further cracking, which causes replacement.

The **NACCO**[®] System is proven and thoroughly reliable. It is approved and used by State departments, County departments, City departments, major auto rental's, truck leasing companies and Insurance companies. **NACCO**[®] resin is the most advanced resin available. So with all of this it should also carry the **best guarantee**. For the period you own your vehicle, we will refund your money if the repaired area does not retain it's optical clarity, fails to pass inspection, or cracks further.

For a demonstration of the remarkable **NACCO**[®] windshield repair contact the authorized **NACCO**[®] dealer listed here. They're the friendly experts in your area for all your windshield repair needs.
